PROFILE

Computer Science graduate (Integrated Master's) with hands-on experience building and deploying full-stack web applications (Spring Boot, React, SQL/NoSQL) and with technical support experience through military service. Comfortable across the stack, from backend APIs to frontend UI and cloud deployment (Render, Docker). Proficient in Java, JavaScript/TypeScript and Unity. Eager to bring rapid-learning ability and strong troubleshooting skills to a collaborative engineering team.

EXPERIENCE

Ionio Gastronomy Suites

Hotel Reservation Manager

2024 – 2026

Ioannina, Greece

Research and Informatics Office, Hellenic Army

Computer Programmer

2023 – 2024

Ioannina, Greece

- Automated regular maintenance tasks using PowerShell scripting, reducing manual system upkeep.
- Provided technical support for HQ equipment and staff, swiftly resolving issues by leveraging deep system knowledge.
- Developed strong interpersonal skills and coached new team members on technical procedures.

PROJECTS

[Movie-API — Full-Stack Movie Browsing & Review App](#)

Spring Boot, React, MongoDB Atlas, Docker, Render

- Built a full-stack app for browsing movies, watching trailers, and leaving reviews; deployed backend and frontend separately on Render, containerizing the Spring Boot API with Docker and configuring environment-based URLs and CORS for production.

[Hotel Reservation Manager — Full-Stack Booking App](#)

Spring Boot, React, MySQL, Docker, JWT, Render

- Built a full-stack hotel reservation system with a Spring Boot backend, MySQL database, and JWT authentication; deployed to Render (Dockerized backend, static-site frontend), resolving DB config and environment-variable issues.

[Gym Exercise Tracker — Full-Stack Workout Logger](#)

Spring Boot, React, TypeScript, PostgreSQL, Docker, Render

- Built an app for logging gym exercises with a Spring Boot backend and a React/TypeScript (Nx) frontend; containerized with a multi-stage Dockerfile and deployed to Render using environment-specific config profiles.

[Endless Outrun — Android VR Game](#)

Unity, C#, Google Cardboard, Git

- Programmed game logic and object lifecycle in C# for a VR endless runner; used gyroscope input for immersive control and optimized object destruction for a low memory footprint on older devices.

EDUCATION

University of Ioannina, Department of Computer Science & Engineering

Integrated Master's in Computer Science & Engineering

2015 – 2022

Ioannina, Greece

- Coursework in algorithms, data structures, and software engineering principles.
- Master's Thesis: “Virtual Tour of the University of Ioannina.” Designed and implemented a 3D virtual tour in Unity, extracting geographic data using RenderDoc and Blender and scripting interactivity in C#.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, C#, SQL

Frameworks & Tools: Spring Boot, React, Unity, Docker, Git, MongoDB, MySQL, PostgreSQL, Render

Soft Skills: Rapid learning, team collaboration, troubleshooting, technical support

LANGUAGES

Greek (Native) ❖ English (C2) ❖ German (B2)
